

RHYAS Multi-Use Broadcast Spreader

- ◆ 35kg Capacity
- ◆ Solid Wheels
- ◆ Suitable for:- Fertilisers, Rock Salt, Grass seed and many other spreading applications.

This high capacity broadcast spreader has a large 35kg hopper. Suitable for distributing rock salt & grit throughout winter.

The non corrosive dispensing hopper is mounted on a steel chassis and features a foldable steel handle.

The distribution rate is controlled by the lever mounted on the handle. The flow rate is started, stopped and adjusted by this lever.

The unit has a direct drive rotor which produces the 360° spread.

When completed you can simply fold down the handle for easy storage until required.
